

Campus Wi-Fi Setup Guide (Multi-Platform)

Last updated: April 24, 2026

The campus Wi-Fi supports various operating systems. Before proceeding, please ensure your Wi-Fi is enabled and select the appropriate campus SSID (FJU-2.4GHz or FJU-5GHz) from the network list.

Detailed configuration guides for Android, iOS, macOS, and Windows are provided below:

Android:

- Step 1. Enable Wi-Fi function.
- Step 2. Select FJU-5GHz from the list of available networks.
- Step 3. Select the following options and enter your ID & Password.
 - EAP Method: PEAP
 - Phase 2 authentication: MSCHAPv2
 - Identity: LDAP account.
 - Password: Password for LDAP account.
 - Certificate / CA Cert: Don't validate.
- Step 4. Tap the Connect button.

iOS:

- Step 1. Open Settings and tap Wi-Fi.
- Step 2. Select FJU-5GHz from the list of available networks.
- Step 3. Enter you LDAP account and Password, then tap "Join".
- Step 4. Verify that the Certificate states that it is from wlan.fju.edu.tw. Tap "Trust" to connect.

Mac OS:

- Step 1. Click the Wi-Fi icon in the top right corner of Mac OS menu bar.
- Step 2. Select FJU-5GHz from the list of available networks.
- Step 3. At the prompt, enter you LDAP account and Password. Check "Remember this network" and Click "Join".
- Step 4. Click on "Show Certificate".
- Step 5. Verify that the Certificate reads "wlan.fju.edu.tw", check "Always trust" and click "Continue".
- Step 6. Enter your Mac Account and Password to allow this changes. Click "Update Settings".

Windows:

- Step 1. Click on the wireless network icon in your Windows taskbar.
- Step 2. Select FJU-5GHz from the list of available networks and click "Connect".
- Step 3. Enter your LDAP account and password, then click "OK".
- Step 4. Click "Connect".
