Review of 2023

In 2023, Nanzan University launched a new three-week study tour called the 'Nanzan Anime Study Tour.' Nine students from three countries attended the first commemorative tour.

Each day, the students participated in a discussion-based lecture in the morning. The class discussion was a great way to enhance critical thinking skills and gain new perspectives. Additionally, participants had the chance to explore the Nagoya area on their own or with the help of "Nanzan Anime Study Buddy", who are volunteer Nanzan students. Besides, there were also three field trips included in the program.

Because everyone shared an interest in anime, they got along well and enjoyed learning about each other's cultures and languages.

Student Voice

The lectures were far more insightful than I had anticipated! Our professor was very helpful in guiding and furthering our academic discussion, and always had something to add to bring more out of class. Anime has never been so thought provoking!

The trips were very fun, and we were able to do many things you would be unable to do on a normal vacation to Japan. We were able to see a lot of cultural things and scenery.

The Nanzan Anime Study buddies students were all great and very friendly. It was a fun way to experience authentic Japanese youth culture and find places to go that wouldn't be featured on tourist websites.

Regarding the daily life in Japan, I think it's interesting how fast I got used to it. Although many things are so much different than home, the Japanese mentality gave me the possibility to explore it in my own pace. The cities are so big, that you could probably never stop discovering new things, which is beautiful.
